

Escape the CI/CD debug loop

Frank Sauerburger

EuroSciPy 2024, Szczecin

Jakub Kozłowski λ

@kubukoz

okay @github, I know my builds are shit but no need to be passive aggressive about it

Build Failed

✗ The build failed, just like the previous build.

Update pipeline

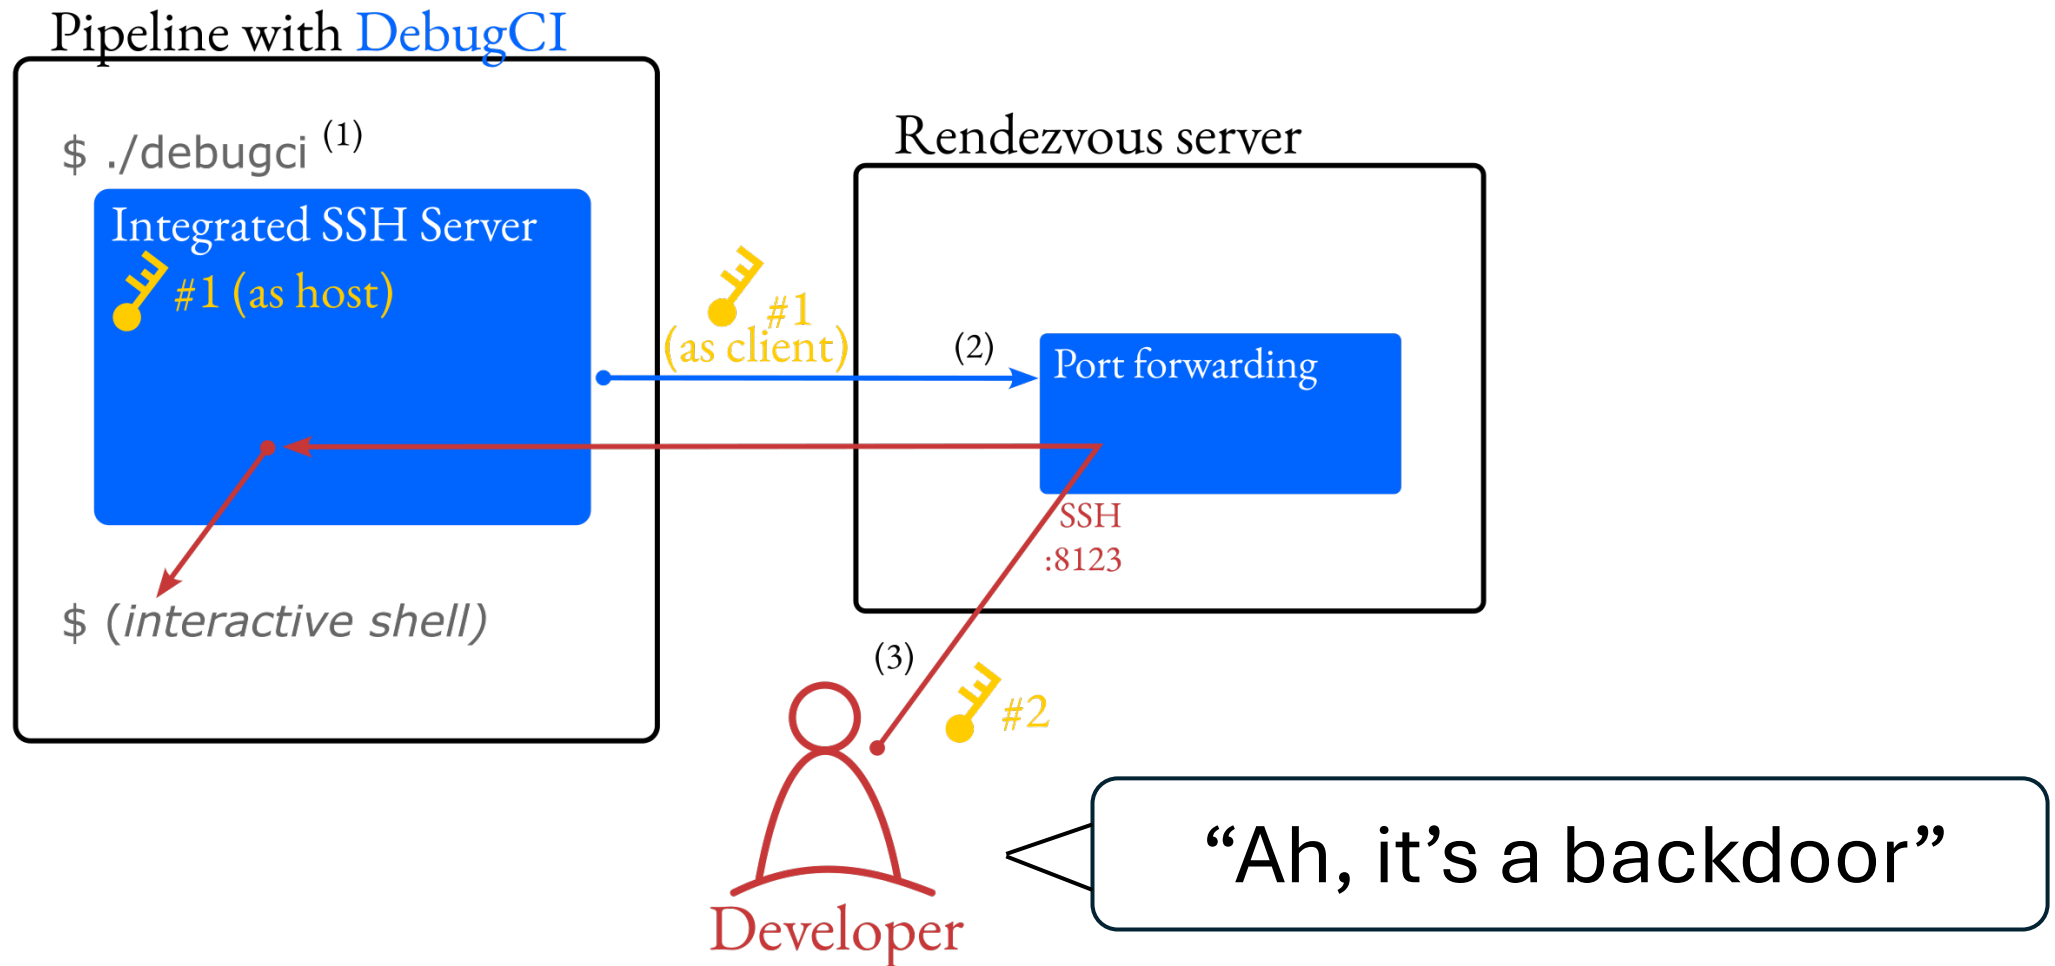

#48419 master 75d87090

CI/CD is about fast iteration

DebugCi.dev

Works well in GitLab

- Minimal setup
- Trigger on failure
- <https://debugci.dev>

```
your_job:  
  # Other settings  
  needs:  
    - job: debugci # Injects binary  
      artifacts: true  
  script:  
    - trap ./debugci ERR  
    - # Rest of your job
```
